## Modified Silicone Fluid for Resin Modification (For North and South America)

R R R RR R R R R R R R R Dual-end type Side-chain type Single-end type

# What is Modified Silicone Fluid for Resin Modification?

Modified silicone fluid for resin modification is a silicone fluid that incorporates various organic and reactive functional groups into some silicon atoms. By reacting and incorporating it into other resins, the excellent properties of silicone fluid can be given.

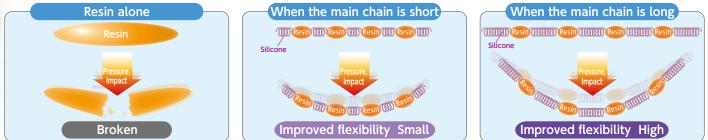

# Three Types of Modified Silicone Fluid for Resin Modification

Expected effect

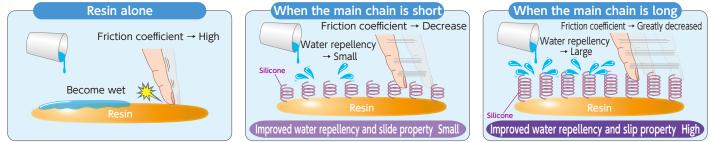

Surface Modification Improvement of Mechanical Properties Side-chain type Single-end type Dual-end type Structure model Structure model Structure model Model of modification Model of modification Model of modification Block copolymerization Random copolymerization Graft copolymerization Untreated sin())Resin())) Silicone randomly incorporated into resin Stretching and shrinking Broken surfaces or internal resin that improves resin strength, As silicone exits the surface of the resin, of silicone improves water repellency, and slip properties. resin strength water repellency and slip property are imparted.

## Example of characteristic improvement with length of siloxane main chain

Model of flexibility improvement by block copolymerization of dual-end type

Model of water repellency and slip property improvement by graft copolymerization of single-end type

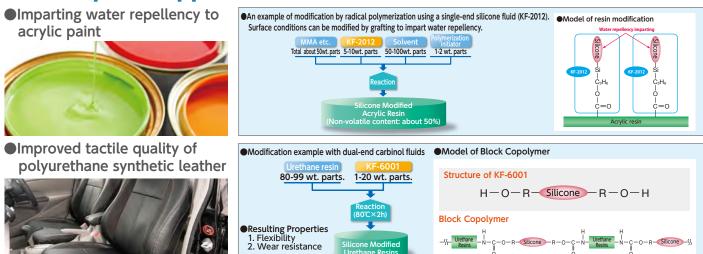

## Relationship between siloxane main chain length and reactivity

Select the product by looking at the balance between the siloxane backbone and reactivity.

\*Functional group equivalents are the number of functional groups relative to the length of the siloxane main chain. Products with a short main chain have a relatively high proportion of functional groups in the molecule

### Example of application

ilicone Modified

## Organic functional groups and applicable resins

	Types of resins	Thermoset resin		Thermoplastic resin

\*1 Hydroxyl group value [mgKOH/g], Functional group equivalent weight [g/mol] = 56,000/Hydroxyl group value [mgKOH/g] (Not specified values) \*2 Including non-reactive & dual-end type carboxyl-modified silicone fluid

\*3 Active ingredient 50% (acetate IPA dilusion)

## **▲ Storage & Handling Precautions**

- 1. Many modified silicone fluids contain organic functional groups or hydrolyzable groups, and their reactivity varies. Before using these products, carefully consider their respective characteristics.
- 2. Heat, light, acids and bases may cause deterioration of modified silicone fluids. Take care to prevent contamination, and seal tightly and store in a cool, dark place.
- 3. Our modified silicone fluids are not produced specifically for medical use. Accordingly, they should not be used as is for orthopedic or cosmetic surgery or other medical applications.
- 4. If amino-modified silicone fluid is being used as an aerosol and the particles are inhaled, there is a possibility of acute inhalation toxicity. Average consumers should not use amino-modified silicone fluid in spray applications.
- 5. Some silicone products described herein are classified as hazardous materials under the laws of certain countries. In such cases, the laws must be followed regarding storage, labeling, and handling.

#### **Safety & Hygiene**

- 1. Some modified silicone fluids may cause skin irritation. If contact occurs, they are difficult to remove from the skin, so always wear rubber gloves (etc.) and avoid contact with the skin and mucous membranes. In case of contact, wipe with a rag, then wash with soap and water or flush thoroughly with water. In case of accidental eye contact, immediately flush with water for at least 15 minutes and then seek medical attention.
- 2. Be sure there is adequate ventilation when handling these products. If you feel ill after breathing in the vapors, move immediately to an area with fresh air.
- 3. Keep out of reach of children.
- 4. Be sure to read the Safety Data Sheets (SDS) for these produtcts before use. SDS are available from the Shin-Etsu Sales Department.

#### Other

- Some of the products (product name starting with X) featured in this catalog are preproduction prototypes. Please contact Shin-Etsu to confirm the availability of all products.
- 2. For cosmetics, "A Grade" products are available, but in some cases a separate application is required if modified silicone fluids are to be used as a cosmetic ingredient. Please contact Shin-Etsu regarding required documents.
